5th Annual Computer Science Institute for Women

July 16-17, 2019
9 am- 4 pm daily

Danforth Plant Science Center
975 N. Warson Road
St. Louis, MO

Explore computer science and its applications in scientific research.
Participants: [Young women in high school and community college](#)

Topics covered in the interactive 2-day workshop with faculty and students from the Danforth Plant Science Center:

- Computer vision- what is it and how to use it?
- Work with Raspberry Pi microcomputers
- Virtual and Augmented Reality
- Artificial Intelligence
- Remote sensing - Hyperspectral imaging

There is NO registration fee. Come learn with us!

For more information and to register, contact Terry Thomas, Director of Science Education at 314-587-1436, tthomas@danforthcenter.org or click [here](#) to register on-line.
